GENERAL		LIST	FIRM.	
though	Negleote	d and	Listless-	

New York, Jan. 25.-Development over the week end had no effect in moving speculative interest in the stock inarket, although some of them were of undoubted importance in their financial bearings. Foremost among these was the fact that the Bank of England was permitted to take up the South African gold laid down in the London market at a concession in price and without any competition on behalf of Paris. This is the first week for this to happen since a period well back into last year, and marks the culmination of the long accumulations of sold of the Bank of France which has been going on during that period. The issue of the Russian loan is now expected to lead to a great easing of the Paris money market. Redundant money markets throughout the world are thought likely to follow. Such a condition would be but an aggravation of a silvation always a New York the York t a situation already existing in Nev York Speculation tends to stagnat in conformity with indications of back wardness in the business developments wardness in the business developments. Market movements are confined largely to individual stocks regarding which there are special developments. There was a group of stocks related to the fertilizer industry thus affected today by rumors of an intended merger of these companies, although sharp relapses followed in some of them. The general list, while neglected and listless, was firm. The redundant state of the money market places no pressure on holders of securities. There was a pronounced easing of time money rates today, lenders coming forward with large offerings at recently prevailing bid rates. There is an eager demand for the scanty supply of commercial bills in the market.
